

Learning and Growing Together

We develop a lifelong love of learning

At Fountains Earth and St Cuthbert's C of E federation we are all learners together. Staff share their learning experiences with the children and celebrate the experience of learning something new. We want all of our children to enjoy the process of learning so that they leave us with a passion for finding out new things. We know that children who love learning are more likely to enjoy school, to achieve and to be successful in the future.

We make learning fun so that children get a 'buzz' out of learning.

We recognise that learning is not only academic and we incorporate life skills preparing children for a future in a rapidly developing world.

We know that teachers who love teaching teach children to love learning. Our Federation gives the staff the freedom to be experimental and creative in their teaching.

We understand that children learn in different ways—visual, auditory and kinaesthetic. We give children as many first hand experiences as possible.

We teach children how to be resourceful and give them opportunities to take their learning further if they so wish.

We plan a wide range of experiences to promote and nurture individual interests and talents.

We promote independence - we want children to take ownership of their own learning by self assessing and identifying their own next steps.

We aim for children to be self-motivated and to have the ability to recognise their own successes.

We want children to question, to have an opinion and to be inquisitive.

NEVER STOP
LEARNING,
BECAUSE LIFE
NEVER STOPS
TEACHING
