

# Learning and Growing Together

## We encourage and embrace challenge

We know that providing children with challenges in many different ways will help them to grow and learn. We carefully construct challenges that are realistically achievable so as to build confidence. This is a very fine balance and we know that some children are more open to challenge than others. Our knowledge of each individual child is therefore crucial so that we can work with them to be resilient, positive and confident individuals with an open mind and a positive attitude!

Mistakes are our friend—they help us learn!

We teach the children to have a growth mindset and a 'can do' attitude.

We support children who are less confident when faced with a challenge. We work with them to overcome this.

We talk about mistakes and what we have done to overcome them.

We encourage parents to be positive and supportive of challenge.

We want children to know that there are no barriers to their success.

We provide challenge in many ways, not only academic.

We are a forward thinking staff team and embrace challenges ourselves.

We teach the children to believe they can . . . and they will . . .

Embrace Your  
**Challenges**  
with an open heart,  
because through  
every challenge  
strength forms.
