

# Learning and Growing Together

## We take pride in everyone's achievements and successes

We encourage our children to share any successes with everyone so that we can celebrate together and feel a shared sense of pride. We also aim to extend this to sharing family, staff and community achievement. Sharing good news and recognising the diversity of success helps children to see that they can achieve and succeed in an inconceivable number of ways, whatever age, independently, as a group or as part of a larger community. We inspire each other!

We share success in weekly community assemblies and encourage children to bring in their home achievements to inspire each other.

We encourage children to talk about their success in a humble way and teach children to be proud of each other, not jealous or envious.

We model how to give praise and how to give heartfelt compliments. Staff share their own successes with each other and there is a leadership culture of valuing staff achievements.

We make parents welcome in school and want parents to share their personal achievements with us. This inspires us!

We encourage parents, governors and the community to take an active part in school life.

We use many different forms of celebration from newsletters to the website, from the newspaper to postcards of recognition.

We encourage children to embrace challenge and set their own goals in order to feel successful.

We aim for children to be self-motivated, to have a growth mindset and to become successful learners.

Our schools take an active part in the life of the community and enjoy being part of wider success.

SUCCESS ISN'T JUST ABOUT WHAT YOU ACCOMPLISH IN YOUR LIFE, IT'S ABOUT WHAT YOU **INSPIRE** OTHERS TO DO.
